ADAPTABILITY IN LIGHTING CONTROL

PTM-265
Decorator Style Switch

Overview

Our Decorator style switches use a mechanical energy harvester that is powered by the touch of a finger and is completely battery free.

These switches can be used with any of Gentec's wireless lighting control solutions for On/Off and dimming control. They are available in either single or dual paddle in white. This color matches Leviton's correlating cover plate color (purchased separately). Mount in standard wall boxes or with flush mounting plate on any surface that is convenient (smooth surfaces for double sided tape (not included) or drill-able for screw mounting).

Create multi-input switching strategies for 3, 4 or up to 20 way switching with wireless Decorator style switches.

Accessories available to order include single, two and three gang flush mounting plates and Antimicrobial Silicone Sleeves.

Equipment Profiles

Single/Dual Rocker	EEP: F6-02-02 Light and Blinds Control

Mechanical Specifications

Operating Temperature	–25 °C to 65 °C (–13 °F to 145 °F)
Relative Humidity	5 % to 92 % RH (non-condensing)
Weight	85 g (3 oz)
Dimensions	115 x 71 x 20 mm (4.5 x 2.8 x 0.8 in)
Life Cycle	50,000 actuations
Mounting	Screws or double sided tape (not supplied)

Technical Specifications
