

Environmental Policy

Aware of the issues associated with reducing environmental impacts, Gentec promotes the integration of environmental and social dimensions into its business practices in a sustainable development perspective.

In order to prevent pollution and protect the environment by minimizing the environmental impacts of our activities, products and services, Gentec is committed to:

- Comply with applicable environmental laws and regulations.
- Continuously improve its environmental performance and effectively manage its significant environmental impacts, notably by managing its residual materials according to the 3R-RD principle (Reduction at Source, Reuse, Recycling/composting, Reclaim, Disposal) and by consuming minimal resources.
- Encourage clean (green) technologies.
- Educate, train and motivate employees to perform tasks in an environmentally friendly manner.
- Encourage environmental protection through its suppliers and subcontractors.

This policy will be communicated to all employees, contractors and suppliers, and will be available to the public.

François Giroux, CPA, ASC
Président de Gentec Inc.
