Adaptability in lighting control

The KS Network Switch

The KS Network Switch by Gentec has been designed to allow you to easily connect to the building's automation network (BAS).

- Compatible with the K6 (Bacnet IP) & K8 (LON) control cards series.
 - low voltage switch
 - network communication over a twisted pair
- LED status for each button
- Fits standard decora style light switch plate cover.

ENERGY MANAGEMENT

The KS-86 Network Switch

Designed to perform automation functions of a Bacnet network. The K6 series panel has been developed to be integrated into a building's Automation Network via Bacnet IP/MSTP.

- Graphic Interface
- Master Card with Astronomical time clock
- Built-In Scheduler
- Digital Inputs
- Bacnet Testing Laboratories (BTL) approved

Designed to perform automation functions of a centralized Lonwork network. The K8 series panel has been developed to be integrated into a building's Automation Network via Lonwork (Echelon).

- Graphic Interface
- Individual 365-day astronomical time clock
- Output relay controller card
- Digital and Analog Inputs

COMPATIBLE
WITH K6 AND K8
